Work experience — 1 year 8 months

May 2025 — till
now
1 year 3 months

Digital systems(Rakat systems)

Senior Full-stack разработчик

Responsibilities and Achievements

— Developed corporate web applications and internal information systems as a Senior Full-stack Developer, with a primary focus on Python Backend development;

— Designed backend architecture, REST APIs, PostgreSQL database structures, authentication mechanisms, user roles, and access control systems;

— Implemented business logic, process automation, and integrations with external services, CRM, ERP, and electronic document management systems;

— Participated in the full software development lifecycle, including requirements analysis, task decomposition, development, testing, deployment, and technical support;

— Developed and implemented corporate platforms and web systems for ICG, APVO, Fayz Oil, Taewoong Global Logistics, MEDICOM, and DIRAN MEBEL;

— Implemented B2B product catalogs, user accounts, application forms, analytics dashboards, order management, and customer request processing;

— Developed the MVP of the Sotuvchi Agent AI Sales SaaS platform, including authentication, dashboard functionality, AI agent configuration, and LLM API integration;

— Performed SQL query optimization, backend module refactoring, code reviews, logging implementation, and error handling.

Andijan IT Academy

Frontend-mentor, React.js, Next.js, JavaScript и TypeScript.

Responsibilities and Achievements

Key Responsibilities

- Conducted practical Frontend development classes for entry-level specialists;
- Taught HTML5, CSS3, JavaScript, and TypeScript, including the principles of building responsive and interactive web interfaces;
- Trained students in developing frontend applications using React.js and Next.js;
- Explained component-based architecture, state management, routing, and component lifecycle concepts;
- Taught frontend integration with REST APIs and processing data received from backend services;
- Prepared practical assignments and educational projects based on real-world web development tasks;
- Reviewed homework, conducted code reviews, identified errors, and provided technical feedback;
- Mentored students from building their first web pages to developing complete frontend applications.

Key Achievements

- Trained more than 23 students;
- 10 students successfully completed the training program;
- 3 graduates continued their professional development and secured positions in IT companies;
- Developed a practice-oriented curriculum covering HTML, CSS, JavaScript, TypeScript, React.js, and Next.js;
- Introduced real-world projects, API integration, Git workflows, and component-based architecture into the learning process;

- Implemented a structured homework review and code review process to improve students' code quality;
- Gained practical mentoring experience and the ability to explain complex frontend concepts in a clear and understandable manner.

Professional Skills

- Frontend development instruction;
- HTML5, CSS3, and responsive web design;
- JavaScript and TypeScript;
- React.js and Next.js;
- Component-based architecture;
- REST API integration;
- State management and routing;
- Git and collaborative development;
- Code review, debugging, and refactoring;
- Educational content development and student project mentoring.
